

THE CHALLENGE

As a global leader in the production of high-quality, high-performance polymers, Lectra has a complex supply chain with multiple raw material sources and a wide range of products. The challenge was to optimize the supply chain to reduce costs and improve efficiency.

LECTRA'S RESPONSE

Lectra implemented a supply chain optimization strategy that focused on reducing inventory, improving demand forecasting, and streamlining the procurement process. This was achieved through the use of advanced analytics and data-driven decision-making.

RESULTS

The implementation of the supply chain optimization strategy resulted in a significant reduction in inventory levels, improved demand forecasting accuracy, and a streamlined procurement process. This led to a reduction in costs and improved efficiency.

About Lectra

Lectra is the world leader in integrated technology solutions (software, automated cutting equipment, and associated services) specifically designed for industries using fabrics, leather, technical textiles, and composite materials to manufacture their products. It serves major world markets: fashion and apparel, automotive, and furniture as well as a broad array of other industries. Lectra's solutions, specific to each market, enable customers to automate and optimize product design, development, and manufacturing. With more than 1,500 employees, Lectra has developed privileged relationships with prestigious customers in more than 100 countries, contributing to their operational excellence. The company is listed on Euronext. For more information, please visit www.lectra.com
