

meet quality requirements while staying efficient.

**#4**  
**Minimize learning curve**  
Updates operators' skills and aligns teams with the new technology.

**#1**  
**Convert knowledge**  
Companies that are migrating from an existing digital solution to a more advanced one should be sure that they can **convert information between the two systems**.

**#2**  
**Monitor performance**  
Define and set up project KPIs to **monitor project objectives achievement**.

**#3**  
**Secure smooth transition**  
Convene workshops to **set up adequate processes and best practices** and to challenge those currently in place.
