

ImagePerfect™ 2555 StreetApp

DESCRIPTION

ImagePerfect 2555 StreetApp from Gerber Technology is textured, scuff-resistant print medium with a non-slip surface specially engineered for application of graphics to asphalt, tarmac, pavements, concrete, walls, carpet, wooden flooring and more. Its bitumen-resistant, permanent, adhesive system can be removed cleanly (depending on the substrate), making it an ideal product for promotional graphics in most urban areas on surfaces such as sports arenas, race tracks, car parks, pavements, stone floors for removable displays at street fairs, sporting events, galleries and exhibitions, retail locations, etc. Additionally, because of its adhesive technology, it is also suitable for application to carpet, wooden flooring, walls, etc. (because of the emboss, it makes an interesting wallpaper product).

The IP 2555 surface formulation enables high-level print quality with a large color gamut that ensures colorful images with vibrant area in-fills. IP 2555 has been specially formulated for digital printing on large-format inkjet printers and is suitable for printing with eco solvent, solvent, UV-cured, and latex inks.
