

ImagePerfect™ 2915 Roll-Up Display, Silver Back

DESCRIPTION

ImagePerfect 2915 Roll-Up Display, Silver Back from Gerber Technology is a high-quality, matte white, silver-back, print medium (PET) with excellent lay-flat properties and very high levels of opacity for a wide range of display and roll-up applications, such as point-of-purchase (POP) and roll-up display systems, in which an 100% blackout effect is required. As well as opacity, the silver back-side also adds aesthetic value to the product, with the color harmonizing with most roll-up systems.

IP 2915 has been specially formulated for digital printing on large-format inkjet printers and is suitable for printing with eco solvent, solvent, UV-cured, and latex inks.
