“GST’s leading position in the automotive industry makes it the ideal partner to validate the core technology of the FocusQuantum platform,” adds Javier Garcia, Global Sales Director, Automotive, Lectra. “Because airbags are subject to increasingly strict quality control to ensure passenger safety, it is essential for Lectra to maintain its close working relationship with innovative companies like GST. Together, we can incorporate road safety into the airbag value chain.”

FocusQuantum is Lectra’s comprehensive airbag solution range, combining high-performance laser cutters for both OPW and flat airbags, as well as a purpose-built software suite and a full range of value-added professional services covering implementation, change management and support, to ensure operational excellence in the cutting room. Acquisition of the new FocusQuantum OPW marks the entry into GST’s installed base of their 40<sup>th</sup> Lectra laser cutter worldwide, and their fifth in China. Other GST plants equipped with Lectra laser cutters include Germany, Poland, Romania, the
